-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claim 3 objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. The claim 3 is dependent, and cannot dependent to it.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-2, and 4-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Lizee (5,671,404).

(Claims 1 and 4)

Lizee discloses in figures 1A, 1B, and 3, a system for visually mining information, the system being programmed to mine data from a structured information report for analyzing, being deployed on a three-layer information system, and comprising a data mining module for mining data from the structured information report, the data mining module comprising a parameter obtaining sub-module for obtaining mining parameters and a scanning command; and a querying sub-module for querying data from the

structured information report in accordance with the mining parameters; and a dynamic scanning module comprising: a scanning sub-module for scanning the structured information report; an identifying sub-module for identifying whether data stored in a field of the structured information report match the mining parameters; and a marking sub-module for marking an identified field of the structured information report with a designated mark.

(Claims 2 and 5)

Lizee discloses the data mining module further comprises a parameter setting sub-module for generating an SQL (Structured Query Language) sentence in accordance with the mining parameters (col. 5, lines 34 +).

(Claim 6)

Lizee discloses in figures 1A, 1B, and 3, the structured information report and the scanning image are displayed, the scanning image is overlaid on the structured information report such that the structured information report and the scanning image are displayed in a single integrated view.

(Claim 7)

Lizee discloses in figures 1A, 1B, and 3, further comprising the step of determining whether all the fields of the structured information report have been scanned.

(Claim 8)

Lizee discloses in figures 1A, 1B, and 3, further comprising the step of obtaining a command input by a mouse click, and displaying a data list.

Art Unit: 2163

4. Claims 1, and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Kanaegami (5,297,039).

(Claims 1 and 4)

Kanaegami discloses in figures 1-6, a system for visually mining information, the system being programmed to mine data from a structured information report for analyzing, being deployed on a three-layer information system, and comprising a data mining module for mining data from the structured information report, the data mining module comprising a parameter obtaining sub-module for obtaining mining parameters and a scanning command; and a querying sub-module for querying data from the structured information report in accordance with the mining parameters; and a dynamic scanning module comprising: a scanning sub-module for scanning the structured information report; an identifying sub-module for identifying whether data stored in a field of the structured information report match the mining parameters; and a marking sub-module for marking an identified field of the structured information report with a designated mark (col. 2, lines 67 +, col. 3, lines 42 +).

Art Unit: 2163

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1 and 4 are rejected under 35 U.S.C. 102(e) as being anticipated by Adler (20030033295).

(Claims 1 and 4)

Adler discloses in figures 1-2, a system for visually mining information, the system being programmed to mine data from a structured information report for analyzing, being deployed on a three-layer information system, and comprising a data mining module for mining data from the structured information report, the data mining module comprising a parameter obtaining sub-module for obtaining mining parameters and a scanning command; and a querying sub-module for querying data from the structured information report in accordance with the mining parameters; and a dynamic scanning module comprising: a scanning sub-module for scanning the structured information report; an identifying sub-module for identifying whether data stored in a field of the structured information report match the mining parameters; and a marking sub-module for marking an identified field of the structured information report with a designated mark (paragraph [0090]).
